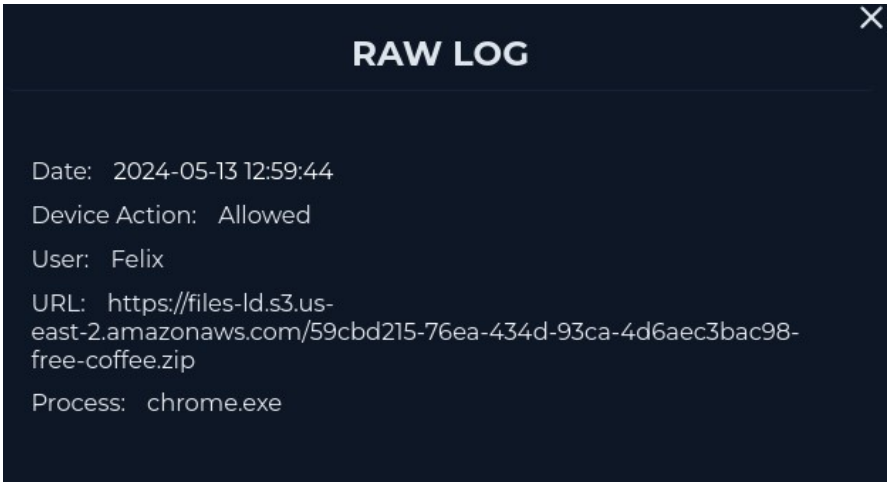
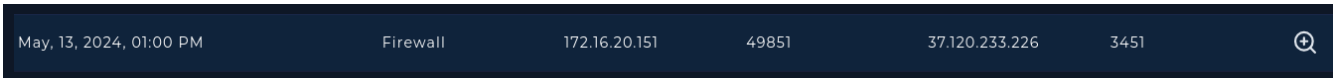
RAW LOG

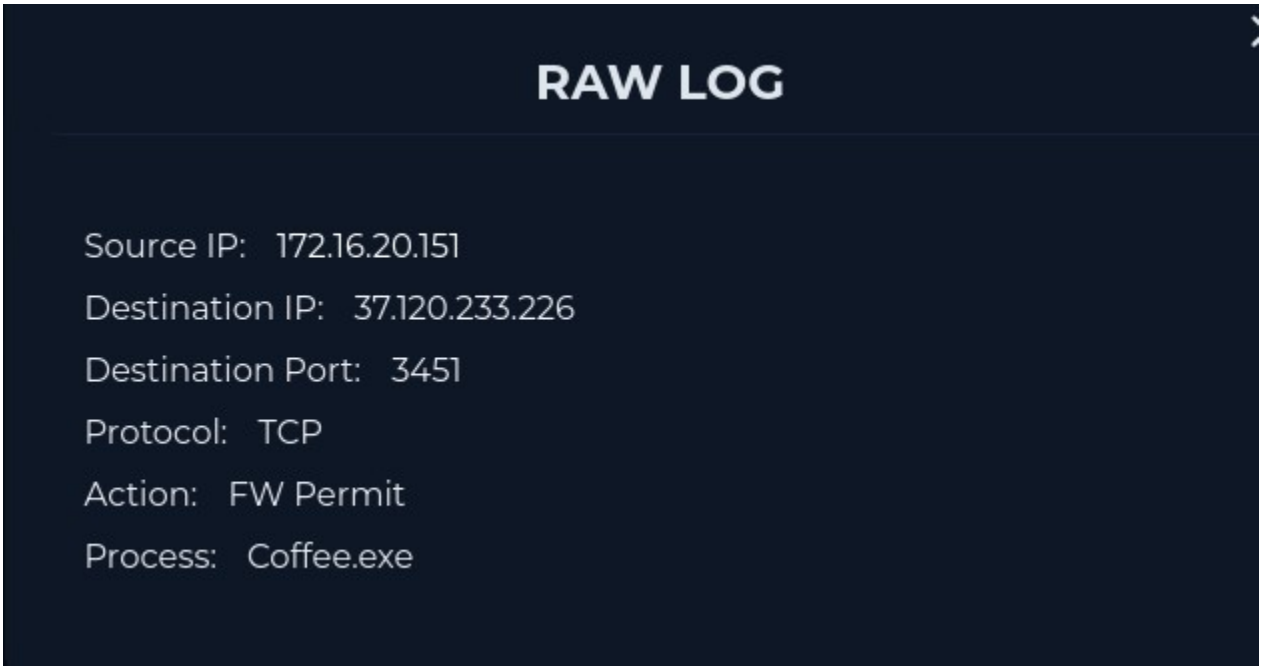
Sender Mail: free@coffeeshooop.com
Destination Mail: Felix@letsdefend.io

At the same day at May, 13, 2024, 12:59 PM Felix opened the email and open url that send in the email , the url that felix open contain zip files.

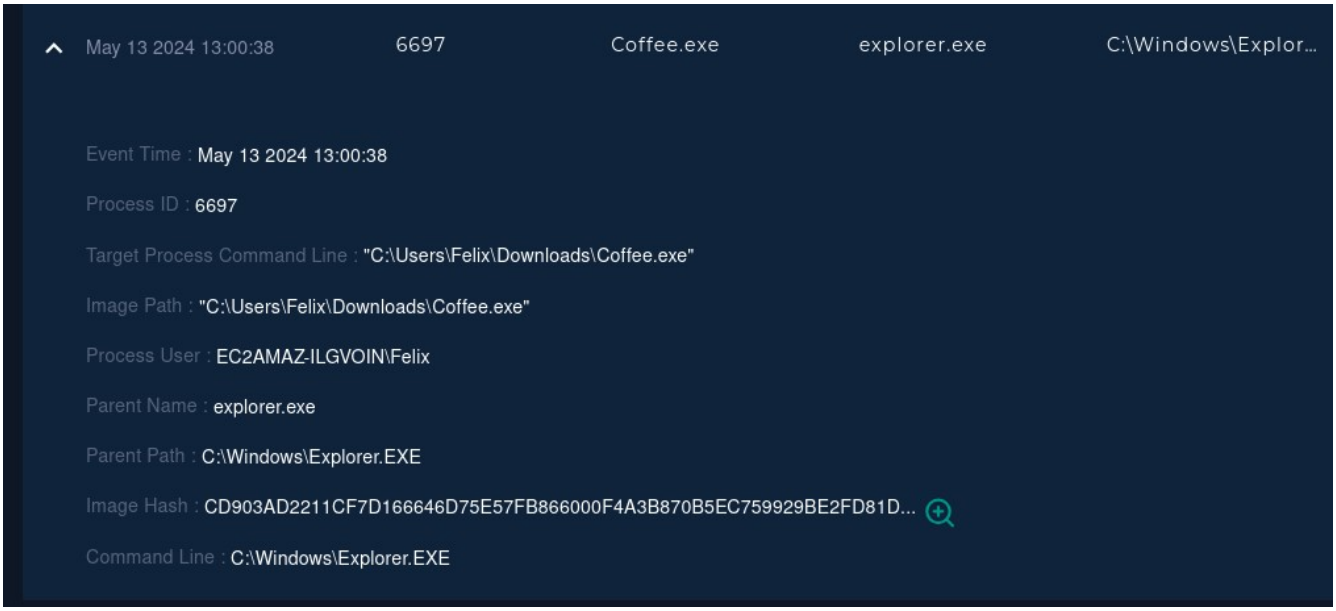


And then at May, 13, 2024, 01:00 PM felix install the application from zipfile . File that felix install is coffee.exe and the destination IP from coffee.exe is suspicious.





At the same time after coffee.exe successfully install in felix device there is a procces that bring up Image hash after I check the hash in virustotal that hash is suspious that indicated backdoor and spyware



Artefact
