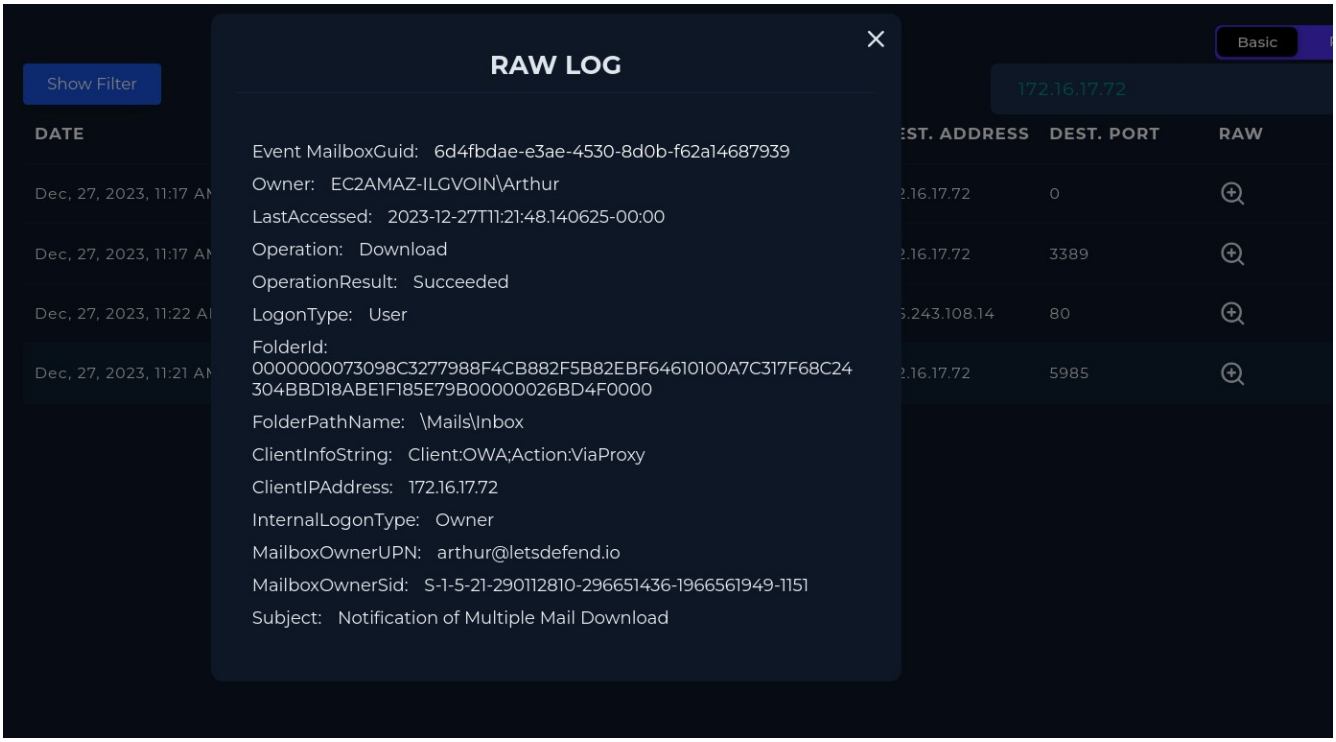
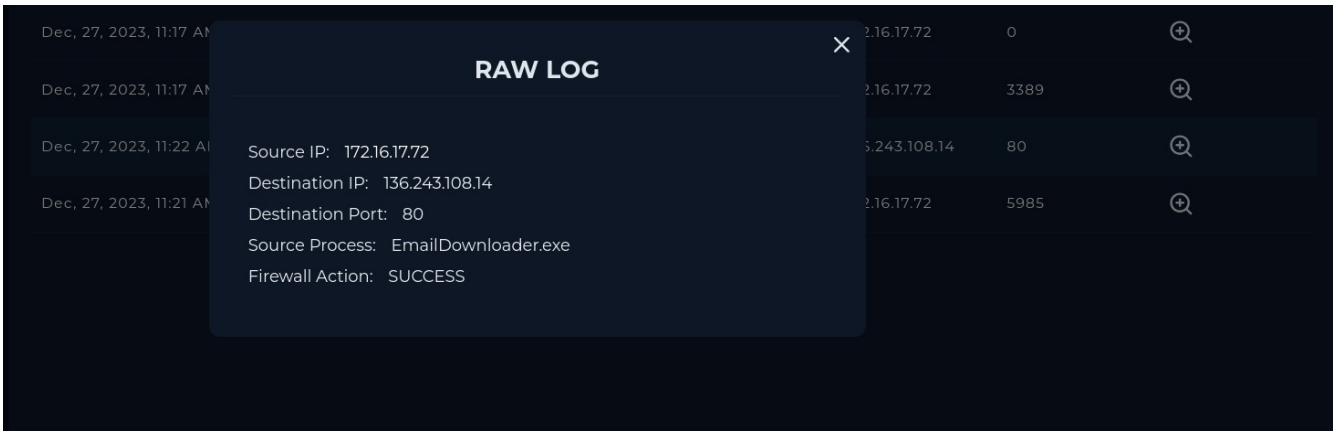
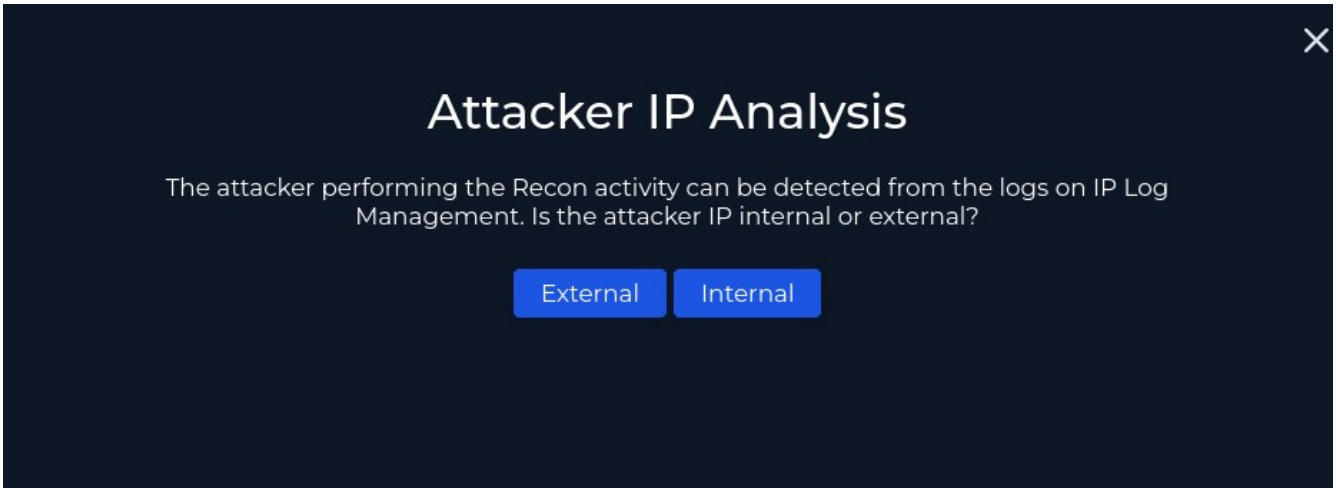
After I checked the hash in the internet EmailDownloader.exe have a connection with APT35 that is group from iran that is steal user data from Gmail, Yahoo!, and Microsoft Outlook accounts . They use tools name HYPERSCRAPE. So we can know the recon type is gather victim identity Information



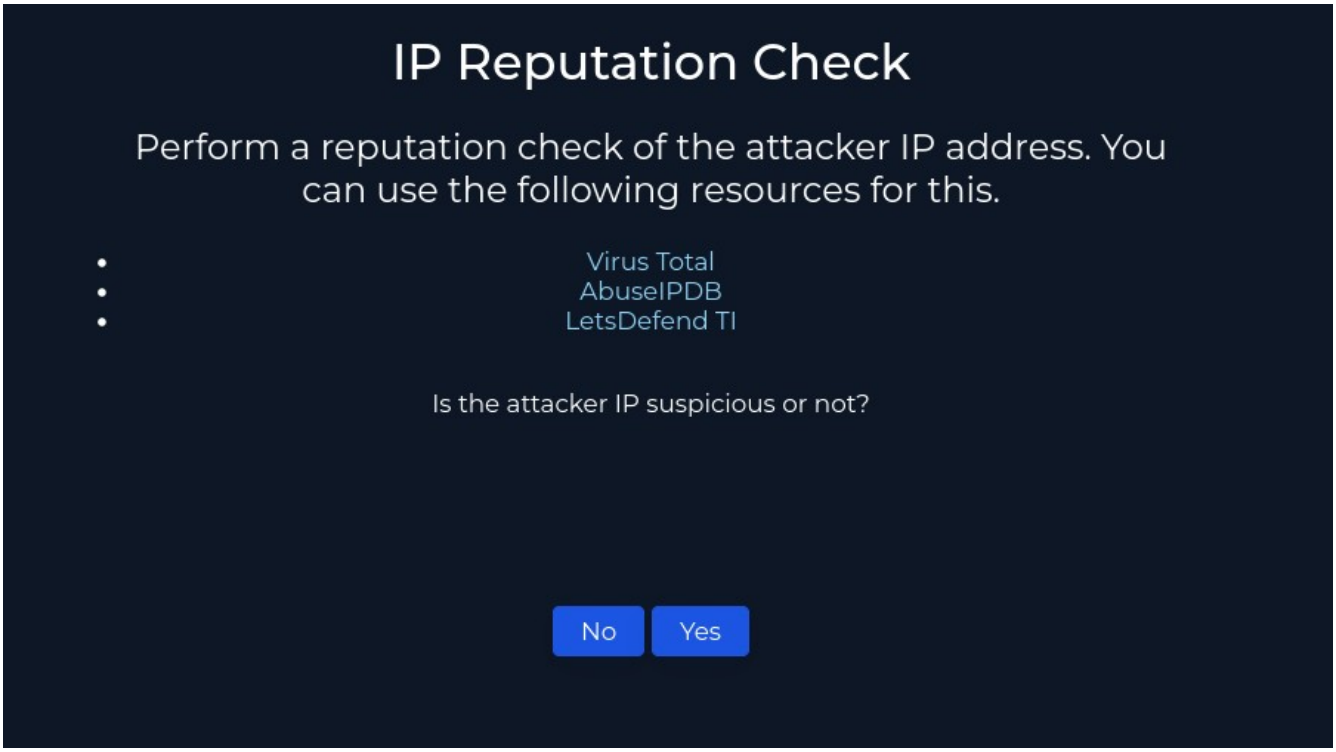
.



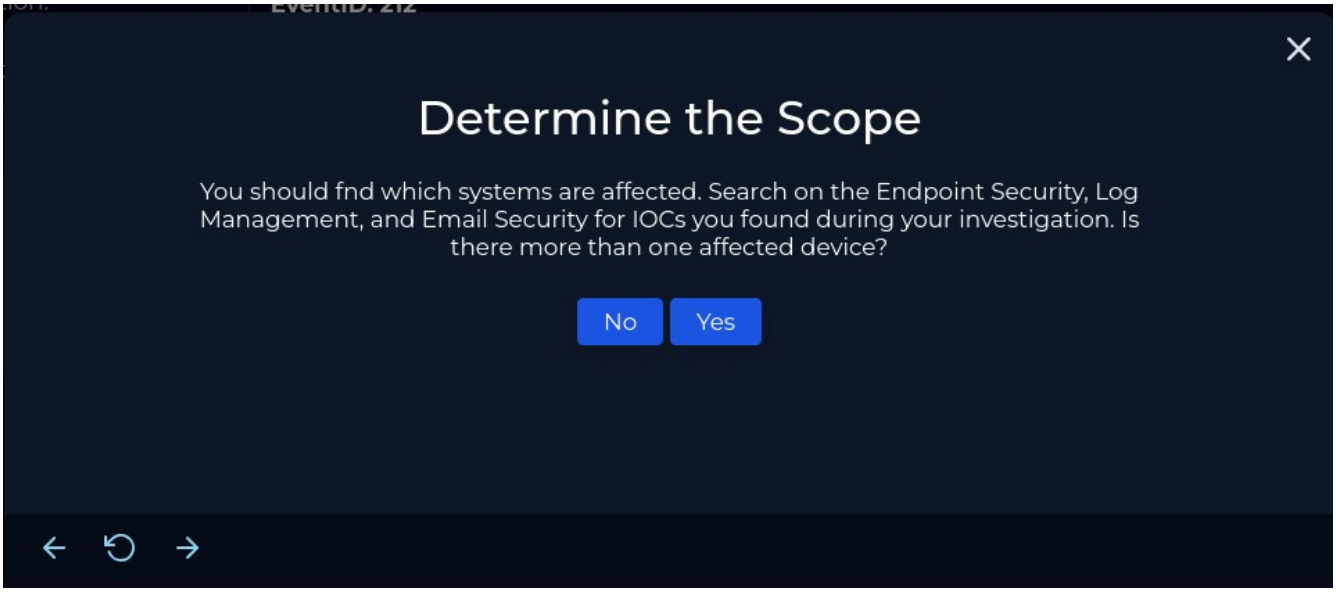
Back in the log management , at 11:21 there is log that show Arthur Download all inbox is really suspicous because one minutes after at 11:22 there is process from EmailDownloader.exe as we know that is APT35 program that is steal Mail target.



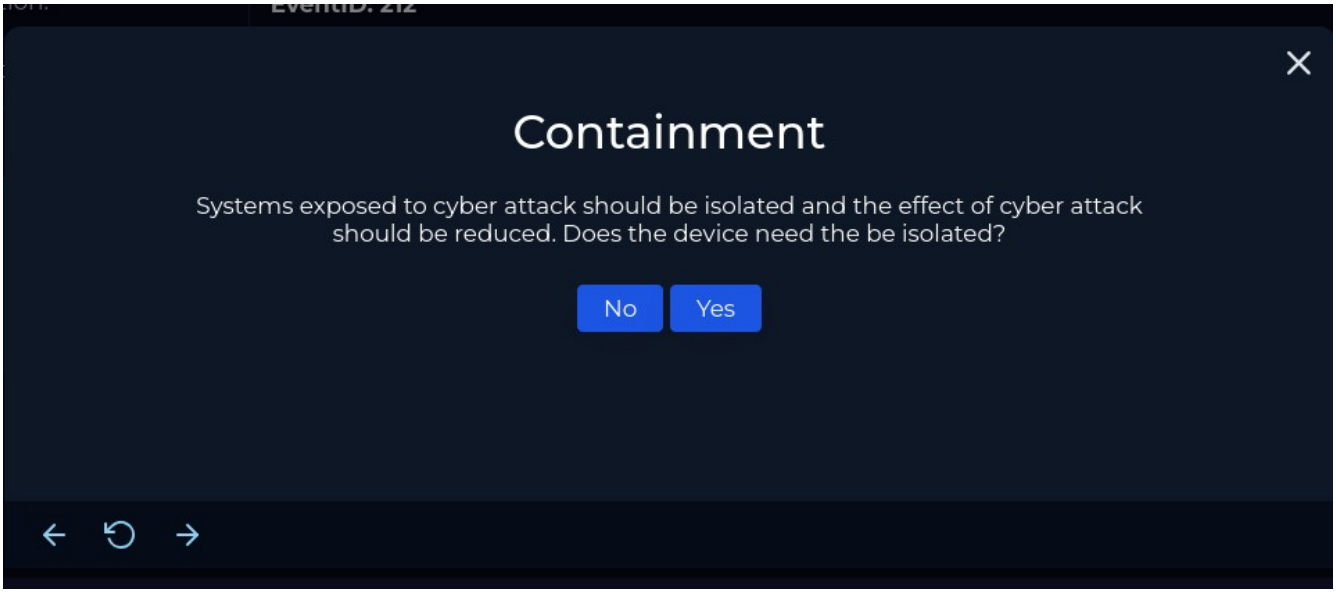
As we can see from previous there is EnailDownloader.exe activity thats go to the 136.243.108.14 after I check the IP is from external



After I check the reputation is suspicions because have 11/94 score



After I checked the log IP who communicated with 136.243.108.14 just 172.16.17.72 or arthur



Yes because this attack is see all email from victim
